THE IMPACT OF VIRTUAL CARE ON RELATIONSHIP CENTERED CARE: OBSERVATIONS OF A FAMILY PHYSICIAN

Mark J. Yaffe

Department of Family Medicine, Faculty of Medicine and Health Sciences, McGill University & St. Mary's Hospital Center, Integrated University Centre for Health and Social Services of West Island of Montreal, Montreal, Quebec, Canada mark.yaffe@mcgill.ca

Keywords: COVID-19, Virtual care, Doctor-patient relationship

he COVID-19 pandemic propelled many physicians and their patients into an unfamiliar world of virtual care. This presentation is based on the perceptions of a family physician/ teacher/ researcher with 43 years of interest in, and promotion of, a strong doctor-patient relationship. It will describe a protocol that governed how tele-medicine and video-conferencing took place over nearly 18 months in his practice. It will then describe observed positive and negative impacts for the patients, their family members, the physician, and members of the family medicine health care team. Interpretation will be made about what such observations mean for the doctor-patient relationship.
